KlexByKem Service Packages

Build one or stack them all — according to your needs.

Three packages help small businesses get found, get booked, and save time, plus a monthly social media add-on. Pricing is quoted per project.

Package 1 — Establish (Online Presence)

Goal: Look credible and easy to find online and on social media.

Best for: Businesses with no website, an outdated one, or only a social media page.

What's included

- Mobile-friendly website or single landing page
- Clear sections: services, about, location, contact
- Contact form that sends inquiries to your email
- Social media profile setup and optimization (one-time)
- Links to your Facebook, Instagram, and messaging apps
- Basic on-page SEO (page titles, descriptions)
- Domain and hosting setup assistance

What you get: A professional page you can share with customers, and inquiries landing in one place.

Done when: The site is live on your domain, works on mobile, and a test inquiry reaches your inbox.

Package 2 — Convert (Booking & Lead Capture)

Goal: Turn people who visit or message you into confirmed bookings and leads.

Best for: Businesses that take appointments, reservations, or rentals and lose customers to slow replies.

What's included

- Landing page focused on one offer and one action (book or inquire)
- Online booking flow with your available schedule
- Automatic booking confirmations and reminders (email or SMS)
- Lead capture form that saves every inquiry to a CRM or sheet
- Simple lead tracking: new, contacted, booked, lost
- Ad and pixel tracking setup so you know where leads come from

What you get: Fewer missed bookings, faster replies, and a clear list of every lead.

Done when: A test customer can book, receives a confirmation, and appears in your lead list.

Package 3 — Automate (Business Automation & Integration)

Goal: Cut repetitive admin work by connecting the tools you already use.

Best for: Growing businesses copying data between apps, chasing follow-ups by hand, or juggling many tools.

What's included

- Review of your current process to find time-wasting tasks
- Automated workflows (e.g., new lead > CRM > follow-up message > team alert)
- Integrations between your apps (forms, CRM, calendar, sheets, payments, messaging)
- AI assistance where it helps, such as drafting replies or sorting inquiries
- Error handling and alerts, so failed steps are caught and fixed
- Secure handling of logins and API keys
- Short walkthrough video and written guide for your team

What you get: Less manual data entry, consistent follow-ups, and time back each week.

Done when: Each workflow runs end-to-end on test data, errors trigger an alert, and your team has the guide.

Add-on — Monthly Social Media Management

Goal: Stay visible and consistent on social media without doing it yourself.

Best for: Businesses that want regular posts and engagement but lack the time or team.

What's included

- Monthly content calendar, approved before posting
- Branded graphics and captions
- Scheduled posting on your chosen platforms
- Basic comment and message monitoring
- Monthly report: reach, engagement, and follower growth

What you get: A steady, professional social presence that supports your website and bookings.

How it works: Can be added to any package or bought on its own. Billed monthly; pricing quoted per number of platforms and posts.
